

Uğur Dilber

MIS & CENG Student

Profile

I am a third-year Management Information Systems (MIS) student at Bilgi University, pursuing a minor in Computer Engineering. With a strong interest in technology, AI, and data, I have developed a solid foundation in programming and analytical thinking. I possess strong problem-solving skills and am currently seeking an internship to gain real-world experience and further develop these skills.

Projects

View selected projects below.

Machine Learning-Based Preference Prediction Mountain vs. Beach Destinations

Performed data analysis and built an ML model to predict mountain vs. beach travel preferences with 99% accuracy. Used feature engineering, hyperparameter tuning, and evaluation metrics to optimize performance

[KAGGLE LINK](#)

Sorting – Searching Algorithm Performance Analysis

Implemented and analyzed the performance of various sorting and searching algorithms. Focused on comparing the time complexity, space complexity and efficiency of algorithms like Quick Sort, Merge Sort, Binary Search Tree, and Hash Tables through visualization and performance testing.

Work Experience

Front Desk Assistant

Utopia World Resort & Spa Hotel

07/2023 - 09/2023

I effectively reduced customer complaints by delivering prompt and attentive service, ensuring a high level of guest satisfaction. During peak periods, I managed efficient check-in and check-out processes, minimizing wait times and enhancing overall operational flow. To improve cross-cultural communication, I developed basic proficiency in several languages beyond my native one, enabling me to assist international guests smoothly and professionally.

Education

Istanbul Bilgi University – Eyupsultan, Istanbul

Bachelor's Degree in Management Information Systems (English)

Minor Degree in Computer Engineering (English)
